

MUYIDEEN ABDULSAMAD

Full-Stack Software Engineer · Backend · Systems

PROFESSIONAL SUMMARY

Software engineer with 7+ years building and shipping production-grade systems across backend, full-stack, and systems programming. Deployed Kubernetes microservices, multi-vendor e-commerce platforms, and mobile applications used by 100+ real users. Comfortable across the full stack — React.js to FastAPI to Rust — with a strong bias toward clean architecture, performance, and reliable deployment.

TECHNICAL SKILLS

Languages: Python, Rust, Java, JavaScript/TypeScript, SQL, PHP, MATLAB

Backend & APIs: FastAPI, Spring Boot, Node.js, REST APIs, Microservices, GraphQL

Frontend & Mobile: React.js, React Native, Material-UI, HTML5/CSS3

Databases: MongoDB, MySQL, PostgreSQL, Redis

DevOps & Infra: Kubernetes, Docker, CI/CD, Git, Linux, Nginx

Security: Custom encryption algorithms, OWASP best practices, Burp Suite, API security

Other: Spring Framework, JavaFX, PHP, WebSockets

PROFESSIONAL EXPERIENCE

Software Engineer | Freelance / STEM Coders Club

2017 – Present

- Architected and deployed an enterprise management system (FastAPI + React.js) on Kubernetes serving 100+ users; automated workflows cutting manual reporting time by ~60%.
- Built SeenTrad — a full-stack multi-vendor paint marketplace (React.js, Node.js, MongoDB) with agent commission engine, multi-tier referral system, colour simulation tool, real-time inventory, and integrated payment processing; live in production.
- Developed an open-source mobile book app in React Native with annotation layers, offline sync, adaptive reading modes, and community sharing — actively maintained on GitHub.
- Deployed a non-profit organisation website with donation gateway integration, volunteer management portal, and a full CMS.
- Built and integrated JavaFX desktop applications with embedded ML prediction models for client automation workflows.
- Implemented custom AES-based database encryption algorithms across multiple production web applications to meet client security requirements.
- Utilised Spring Boot to architect RESTful microservice backends for enterprise Java clients; improved throughput by ~40% over legacy monolithic implementations.
- Developed and maintained PHP/MySQL backends for 5+ client websites, conducting performance profiling and query optimisation to achieve sub-200ms page load times.

Project Manager | STEM Coders, ABU Zaria

2022 – 2024

- Led cross-functional teams of 8–12 engineers delivering 10+ software projects on schedule using Agile/Kanban (Asana, RACI charts); maintained zero project-cancellation record.
- Served as primary client interface for requirements gathering, sprint reviews, and delivery sign-off across all web and software engagements.

Penetration Tester / Security Engineer | HackerOne · Bugcrowd · STEM Coders

2019 – Present

- Applied security-first thinking to web app and API development; identified and disclosed critical vulnerabilities across production systems on HackerOne and Bugcrowd.
- Hardened production cloud servers with Suricata, Wazuh, Splunk, and OSSEC; achieved 100% clean security audits on all hardened environments.

EDUCATION

B.Eng. Metallurgical & Materials Engineering

Oct 2024

Ahmadu Bello University, Zaria · Second Class Upper (Hons)

Thesis: ML simulation and prediction of steel mechanical properties via iron-carbon phase diagram (Materials Informatics) — 90%+ prediction accuracy.

AWARDS & CERTIFICATIONS

- Tech Oracle Award — NUESA Online Quiz Competition, 2024
- Computational Materials Engineer Class Award — ABU MME Department, 2024
- Google Project Management Certificate · Practical Ethical Hacking — TCM Academy
- Certified Network & Web Pentesting Professional — XSS-RAT · Network Security Assessment — StationX
